

Predicting coefficients for graphs

Contents

1 Motivation 3

2 Features 3

3 Intra-loop modelling 3

4 Predicting l from $p < l$ loop orders 3

4.1 Approach 1: Timeseries approach 3

4.1.1 Feature reduction 3

4.1.2 Shap Analysis 3

4.2 Approach 2: General l learning 3

4.2.1 Feature reduction 3

4.2.2 Shap Analysis 3

4.3 Ensemble learning 3

Abstract

In this set of notes we do the following.

- **denominator graphs:**
 - Intra-loop modelling - ability to model within loop level
 - Modelling higher-loop based on previous loop order
 - Shap value analysis - what is driving the decision
- **f-graphs**

- 1 Motivation
- 2 Features
- 3 Intra-loop modelling
 - 3.0.1 Feature reduction
- 4 Predicting l from $p < l$ loop orders
 - 4.1 Approach 1: Timeseries approach
 - 4.1.1 Feature reduction
 - 4.1.2 Shap Analysis
 - 4.2 Approach 2: General l learning
 - 4.2.1 Feature reduction
 - 4.2.2 Shap Analysis
 - 4.3 Ensemble learning
